Any clinical queries please contact IMAC on **0800 466 863**

Vaccine Return Instructions:

Synflorix vaccine that is no longer required, can be returned to ProPharma for destruction.

Ideally these packs can be placed inside the returnable ProPharma boxes that are used to deliver vaccine orders to your practice. Full instructions for that return process, are printed on the outside of the shipping carton. If that is not practical, then stock can also be sent back in separate parcels that are labelled with a Vaccines For Destruction label; these labels are available under the 'Resources' section of www.fundedvaccines.co.nz. Call the phone number on this label to arrange collection by a courier."
