Those lips have been unlocked on capitation

The report on capitation, long anticipated by the sector, is out now, in fact it's been out since last Wednesday.

The report was proactively released on the website of the Department of the Prime Minister and Cabinet.

In its most recent of three requests for the report, *New Zealand Doctor Rata Aotearoa* had sought a copy of the report on 7 November and late this afternoon received notification our request had been declined because the report was released last week! Who knew.

Here it is for you all to take a look at. We'll take a closer look tomorrow.
